Profile

Having over 5 years of **IT** experience in Enterprise application design and development using Sun's Java based tools and technologies and using IBM® WebSphere tools like **WebSphere Process Server** and **WebSphere Application Server** including Administration.

Professional Summary:

- Hands-on experience in installation and configuration of various IBM® Websphere products like
 - Websphere Integration Developer v6.0.2 /v7.0 using Installation Manager.
 - Deployment Manager, Stand alone and Custom profiles of Websphere Application Server v6.x /7.0 and Websphere Process Server v6.0.2/v7.0 .
 - Standalone Installation of Technology Adapters like Peoplesoft , Siebel and SAP.
 - Implemented various clustering topologies like Golden topology, Silver topology, Bronze topology for Websphere Process Server v6.0.2.
 - Configured various Websphere process Server resources like JDBC providers, JMS providers and Mail Providers via adminconsole.
 - Creation and Configuration of SIBus and providing interconnectivity between different buses using Distribution Queuing concept.
 - Configured Security for Websphere Process Serverv6.0.2 with LDAP as the registry and ITPA as Authentication mechanism.
- Good understanding on SOA Architecture, Process Choreography and Orchestration.
- Good knowledge of IBM SOA Foundation and IBM SOA Reference Architecture
- Hands on Experience in designing and developing SOA Solutions using Websphere Integration Developer v6.x/v7.0
- Good Knowledge on Software development Methodologies like RUP.
- Good understanding on J2EE /SOA design patterns and best practices.
- Good knowledge on various Websphere Process Server clustered topologies like Golden topology, Silver topology, Bronze topology.
- Hands-on experience in designing and developing various SCA component implementations like BPEL, JAVA, Interface maps, Business object maps, Human Tasks, Relationships, Business Rules and Selectors.
- Hands-on experience in designing and developing Mediation Components using XSLT and X- path
- Hands-on experience in designing developing Service components with different Binding like Web services Binding, EJB binding, SCA Binding, JMS Binding, MQ-JMS Binding.
- Hands-on experience and good knowledge on Websphere process Server v6.x/V7.0 Administration concepts.
- Good Understanding on Web service Standards like WSDL,UDDI Registry, SOAP etc.

Education:

- B.Tech, Electronics and Communications Engineering, JNTU, India.

Key Skills

EAI Tools : Websphere Studio Application Developer 5.0, Rational Application Developer, Websphere Process Server 6.0.1/6.0.2, WebSphere Application Server 5X/ 6.0, WebSphere Integration Developer 6.0.1/6.0.2. and WebSphere MQ 6.0, Websphere Service Registry and Repository 6.0

Languages and Scripting : Java, J2EE, BPEL.

Web Tools & Technologies : HTML, JSP, Servlets, JNDI, RMI, XML, MDB, Struts, EJB.

Database Technologies : DB2, Oracle

Operating Systems : Windows 98/XP/2000 Professional/2k3 Server Administration,

Patterns : MVC, DAO.

SOA : Web services, WSDL, SOAP, UDDI.

Certifications:

- **IBM Certified System Administrator - WebSphere Process Server V6.1**
- **IBM Certified System Administrator - WebSphere Application Server, Network Deployment V6.1**

Employment Summary

Company	Position	Date Hired
IBM INDIA (P) LTD	System Engineer	June' 2008 – Till date
SREE INFORMATICS	Integration Developer	May' 2005 – June 2008

WebSphere Developer

HoneyWell MDA

Location : IBM India (P) Ltd Bangalore

Jun'08 –Till Date

BrainTreeHR Consulting Pvt. Ltd

Mrs. Umadevi.I

Phone : 080-32213097

Email: uma@braintreehr.com

URL: www.braintreehr.com

Description:

Honeywell International is a diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services; control technologies for buildings, homes and industry; automotive products; turbochargers; and specialty materials.

The project involves development of HR Portal, which provide various functionalities to the manager like Employee Departure, Transferring an Employee, Recruiting a new Employee, Viewing Employees under his control etc. Process Server is used as a mediation tool between Portal UI and the various end systems like Oracle database, Siebel system and PeopleSoft system.

Roles & Responsibilities:

- Involved in the design, development and Testing of Service Interfaces for Requisition, Requisition Approvals, Transfer Approvals, PeopleSoft Facing Modules and Portal Facing Modules.
- Involved in preparing design documents for Requisition, Requisition Approvals, Transfer Approvals, PeopleSoft Facing Modules and Portal Facing Modules.
- Involved in preparing Portal Process Server integration documents and Mapping Documents for PeopleSoft and Siebel Adapter components.
- Proposed and implemented a POC to provide solution for PeopleSoft Connectivity issues through PeopleSoft Adapter by designing an approach which reduced the development time by 70%, reduced 15% of the defects, increased efficiency and reduced the Server down time.
- Proposed and implemented a POC to address a Business Critical problem with the co-existence of different Profiles of Websphere Process Server with different versions of same .jar files on a single Physical Machine and got appreciations from Client.
- Published a document in Websphere Knowledge Center (WKC) on “Messaging Infrastructure of Websphere Process Server v 6.0.2” which deals with the Messaging capabilities of Websphere Process Server v6.0.2 and ESB like creating SIB Links, MQ Links and Mediations in a Secured Process Server Environment and taken a Technical Session for demonstrating the Messaging capabilities to the team members.
- Worked on Migration of Websphere Process Server components from V6.0.2 to 7.0 using Websphere integration Developer V7.0
- Involved in the Design of Technical Design documents for Requisition, Requisition Approval, PeopleSoft Facing Modules and Portal facing Modules.
- Installed WebSphere Integration Developer 6.0.2, PeopleSoft Adapter.
- Installed and configured the Websphere process Server 6.0.2 Test Environment. Configured Websphere process server 6.0.2 with IBM DB2 UDB 8.0.1.12(BPEDB,WPRCSDB,MEDB).
- Installed and configured Websphere Process Server 6.0.2 Deployment Manager Profile and Federated nodes to it.
- Created horizontal and vertical clusters of Websphere Process Server 6.0.2 for High Availability.
- Created and configured JMS Connection factories, JMS Queues, Activation Specifications through admin console.

URL: www.braintreehr.com

- Created Message engines by adding clusters and servers as members to the appropriate Bus.
- Installed and Configured Stand alone Adapter for PeopleSoft, Siebel and configured adapter properties and connection factory properties to connect to the end systems ie PeopleSoft, Siebel
- Configured and Enabled the Global Security System for WAS Administration for Console users and console Groups using Active Directory Server as a LDAP User Registry.
- Configured JMS Providers and Mailing Providers, which will be used by the SCA components.
- Good Knowledge on Class loader Policies and Transport channel Properties.

Environment: Windows XP, Websphere Process Server and WebSphere Integration Developer, Business Modeler, Oracle, Rational Clearcase.

Additional Roles handled: Practitioners Support Network Technical Expert(PSN TE) for WPS, WID, WAS.

WebSphere Administrator/Developer

Jun'08 –Till Date

Practitioners Support Network

Location : IBM India (P) Ltd Bangalore

Description:

Practitioners Support Network (PSN) is an IBM's Internal Network which supports the practitioners in IBM around the globe on different Technologies. PSN is a Team of Technical Experts which will support the practitioners based on the PMRs raised by them via Ask an Expert Portal.

Roles & Responsibilities:

Working as a Topic SME(Subject Matter Expert) for Websphere Process Server, Websphere Integration Developer and Websphere Application Server. I am Responsible for solving any Kind of issues faced by the practitioners in their Application Development or Deployment and educate the Practitioner by working with him until the issue is solved.

WebSphere Developer

AVIVA - Norwich Union

Location : TCS Bangalore

Jun'07 –Apr'08

BrainTreeHR Consulting Pvt. Ltd

Mrs. Umadevi.I

Phone : 080-32213097

Email: uma@braintreehr.com

URL: www.braintreehr.com

Description:

Aviva is the world's 5th largest insurance group, the biggest in the UK and a leading provider of life, health and pensions products to markets across Europe. Its main activities are long-term savings, fund management and general insurance. The group has 30 million customers worldwide.

Roles & Responsibilities:

- Involved in Preparing Micro level and Macro level Design documents for Service interfaces.
- Developed Mediation Modules using XSLT Transformations.
- Developed Custom Mediations in the required areas.
- Involved in Developing java components.
- Involved in Merging the Artifacts in Version Control Management tool PVCS
- Installed and configured IBM WebSphere Application Server and Websphere Process Server.
- Configured Websphere process server 6.0.2 with IBM DB2 UDB 8.0.1.12(BPEDB,WPRCSDB,MEDB).
- Installed and configured IBM HTTP Server and Plug-in.
- Regenerate the plug in for the web servers and propagate the plug in to Web Server machine.
- Configured and Enabled the Global Security System for WAS Administration for Console users and console Groups using Active Directory Server as a LDAP User Registry.
- Configured the JVM for the Application Server with minimum and maximum heap sizes
- Federated multiple nodes to a deployment manager.
- Configured **BPE container** and **Task container** in a clustered Environment.
- Configured WebSphere resources like **JDBC** providers, JDBC data sources and connection pooling
- Configured JMS Providers and Mailing Providers, which will be used by the SCA components.
- Deployed **EAR** and **WAR** files using admin console.

URL: www.braintreehr.com

Environment: Windows 2000, Linux, WebSphere Application Server 6.0, Websphere Process Server 6.0.2, Websphere Portal Server 5.x, IBM HTTP Server, LDAP, Java, J2EE, JSP, Servlets, EJB, XML, JDBC, DB2, Websphere MQ 5.0, PVCS.

WPS/ WID Integration Developer

Nov'06 –

May'07

Preferred Provider Organization Midwest

Description:

Worked on **BPM (Business Process Management)** Implementation of a **Real Time Clearing House engine** that enables the Payers / Intermediaries to be able to process the claims in real time / batch and also enable the workflow to handle the Business Events, Exceptions, Technical errors, warnings, Operations Events and Steps that need to take place as part of the Claims Processing.

Roles & Responsibilities:

- Developed **Human centric Business Processes** with role based security enabled.
- Involved in Developing the Web clients, which access Task container and BPE Container using Task API and BFM API.
- Configured global security with Custom user Registry on the test server to test the Applications in a secured environment.
- Developed Mediation Modules using XSLT Transformations.
- Developed Custom Mediations in the required areas.
- Involved in Developing java components.
- Involved in designing Micro Level documents and Macro Level documents for the Services.
- Done the unit testing for the Service components Developed.
- Involved in Merging the Artifacts in Version Control Management tool CVS.
- Created MQ Links with External Websphere MQ, which accepts inputs from various Trading Partners.
- Involved in Developing **Transmission Business Process** flow and **Singleton Business Process** flow using BPEL.

Environment IBM®WebSphere Integration Developer 6.0.1, Websphere Process Server 6.0.1, WebSphere MQ, WTX 8.0, SQL Server 2005, CVS.

WebSphere Innovation Center

Jul'06 –

Oct'06

WPS Consultant

BrainTreeHR Consulting Pvt. Ltd

Mrs. Umadevi.I

Phone : 080-32213097

Email: uma@braintreehr.com

URL: www.braintreehr.com

Description:

Worked on demos, proof of concepts, pilot Implementation for various WebSphere and WBI customers. The proof of concepts involved integrating artifacts using WebSphere JCA adapters and WebSphere Process server. Also worked on the WS - BPEL, human task manager, business rules.

Roles & Responsibilities:

- Involved in setting up development environment, strategies and helping team members to understand the design of the product.
- Developed the Business Objects using Service Data Objects interfaces.
- Developed the Web services using Service Component Architecture API.
- Designed WS-BPEL business process using WID modeling tool.
- Develop the Business rules for the processes and constraints.
- Developed a web interface for calling the SCA standalone SCA component.
- Integration testing of the Processes developed in WID.

Environment: WebSphere Process Server 6.x, WebSphere Integration Developer 6.0.1, WebSphere Application Server 6, MQ, DB2, JMS, Windows.

J2EE Developer
Jun'06

May'05-

Project: Order Management System
Client: Production Tool Supply, Detroit, USA.

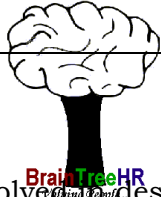

Description:

This project was developed for US based Production tools supplier company. Production Tool Supply is US biggest supplier for Production tools. It was a B2B application aimed at providing a complete

E-commerce solution for the customers of client. This application can be used to place orders, obtain shipping information, product search based on different criteria, previous orders like complete, incomplete and suspended orders and an interactive solution for selecting products and placing orders from the electronic version of booklet provided to the customers.

Roles & Responsibilities:

- Worked as back end java developer for this web based application.
- Used JSP and Servlets for developing different entry forms and managing sessions based on Struts Architecture.
- Developed various filters for maintaining integrity of the system after communicating with database for server side validations.

BrainTreeHR Consulting Pvt. Ltd

Mrs. Umadevi.I

Phone : 080-32213097

Email: uma@braintreehr.com

URL: www.braintreehr.com

- Involved in designing and development of the controller servlet.
- Used validator framework for client side validations.
- Developed interactive booklet for selecting products and placing orders.

Environment: JSP, Servlets, IBM® WebSphere Application Developer 5.1.1, IBM® WebSphere Application Server 5.1.2, IBM®DB2, Windows 2000.
