• Experienced in messaging using WebSphere MQ
• Experienced in deploying the Message Flows and Message Sets in Execution groups.

Key Skills:
• Experience on WebSphereMQ Administration on distributed platforms (WINDOWS & one or more flavors of UNIX)
• Administration and Configuration of WebSphere MQ 5.3 & 6.0 on different environments like Windows and Linux.
• Supported the Queue Managers and several servers on different platforms.
• Good working knowledge and understanding of Unix and Linux.
• Strong working experience on Configuration and monitoring of MQ Listeners, Command Servers, Channel initiators, Trigger Monitors, MQ Log files & Dead Letter Queues.
• Ability to Administer the message objects associated with all WebSphere MQ objects such as Queues, Process definitions, Channels and Listeners.
• Involved in creation of Queue Managers, Queues, Channels and Process definition.
• Experienced in Installation and configuration of MQClient/MQServer in different environments and MQSeries System Administration.
• Enabling Triggering on MQ queues based on the requirement of various interfaces
• Good experience with MQSeries Clustering and implementing Security.
• Strong Debugging and problem solving skills with excellent understanding of system development methodologies, techniques and tools.
• Good experience to setup security for WebSphere MQ queues & other objects for data access and for administration using role-based security
• SSL Configuration on WebSphere MQ is an added advantage
• Experience in using MQ monitoring tools like Omegamon, QPasa etc are added advantage
• Familiarity with the configuration of ini files and MQ registry entries
• Knowledge in administration of Web Sphere Application Server5.X & 6.x.
• IBM Web Sphere MQ V6.0 System Administration Certified.
• Monitoring all Web Sphere MQ objects for effective support.
• Good administration experience on various components of Message Broker that includes Broker Domain, Configuration Manager, Broker, Execution Group, Tool Kit etc.
• Good familiarity with the usage of toolkit for Administration Perspective.
• Good knowledge on how to work with traces - how to start, stop and format them as needed.

URL: www.braintreehr.com

Enterprise platform program of CFS is focused in implementing a robust core banking solution. The core banking solution will enable CFS to provide there customers with a user friendly
interface to perform their transactions online. IBM is working on the middleware solution that will act as an interface between the J2EE based front end application and the existing legacy systems deployed in CFS.

Roles and responsibilities:

☐   Experience on WebSphereMQ Administration on distributed platforms (WINDOWS & one or more flavors of UNIX)
☐   Good Experience on Websphere MQ Architect distributed platforms (WINDOWS & one or more flavors of UNIX)
☐   Administrating IBM WebSphere MQ 6.0 and Websphere Message Broker 6.1 on Windows and AIX 5.3.
☐   Good working knowledge and understanding of Unix and Linux.
☐   Good experience on Configuration and monitoring of MQ Listeners, Command Servers, Channel initiators, Trigger Monitors, MQ Log files & Dead Letter Queues
☐   Created MQ Series objects on local and remote MQ servers.
☐   Created and configured MQ Objects like Queue Managers, Remote Queues, Local Queues, and Queue Aliases.
☐   Involved in Clustering of Queue Managers.
☐   Good experience to setup security for WebSphere MQ queues & other objects for data access and for administration using role-based security
☐   SSL Configuration on WebSphere MQ is an added advantage
☐   Experience in using MQ monitoring tools like Omegamon, QPasa etc are added advantage
☐   Familiarity with the configuration of ini files and MQ registry entries
☐   Developing the MessageFlows and MessageSets by using Message Broker ToolKit.
☐   Deployed Enterprise Service Bus code in the System Test Environment.

Builds and Release Activities:
☐   Maintaining the Build Environment.
☐   Responsible for periodic release builds.
☐   Responsible for maintaining and delivering the output files to preferred testing team.

Environment : Web Sphere MQ 6.0, Web Sphere Message Broker 6.1,Java 1.4,
