WORK EXPERIENCE

WebSphere Administrator & Module lead
CITI Bank - March 2010 to Present

Description
Citigroup is the first financial services company in the U.S. to bring together banking, insurance, and investments under one umbrella. Its 300,000 employees manage 200 million customer accounts across six continents in more than 100 countries. Citigroup is the world's largest company, with total assets of US $2.4 trillion (Sept 2007), total revenue of US $146.7 billion (2006) and total net income of US $21.538 billion (2006). Citigroup is largely organized into five groups: Citigroup Global Consumer Group, the Global Corporate and Investment Banking Group, Citigroup Global Investment Management, Citigroup International, and Smith Barney. The Citigroup Global Consumer Group businesses comprise the financial service sector's most diverse consumer product offerings - banking services, credit cards, loans and insurance.
Major brand names under Citigroup's trademark red umbrella include Citi Cards, CitiFinancial, CitiMortgage, CitiInsurance, Primerica, Diners Club, Citigroup Asset Management, The Citigroup Private Bank and CitiCapital.
Responsibilities
• Installation of WebSphere Application Server V7.0, WebSphere Portal Server V7.0 (WPS), SUN iPlanet.
• Clustering of the environment including the Configuration and customization of Plugin config file for routing the request to the different nodes on cluster.
• Configuration of JVM fine tuning parameters.
• Configuration of Application server with Tivoli Directory server (LDAP) for user repository.
• Upgradation of application server including Fix packs and IFixes.
• Set up and maintenance of Data Center (DC) and Data Recovery (DR) sites, development, Staging, Testing, UAT environment.
• Server performance tuning, Scaling, by interacting and coordinating with UNIX, Network, Windows, security and development team.
• Applying hot fixes in the production environment by deploying the files.
• Providing production support by analyzing server logs, application logs, JavaCore and HeapDump analysis using analyzer tools and fixing the issues in production.
• Worked as the team lead. Used to provide knowledge transfer and sessions to the new joinees and team members.

Team Member-Developer
Supervalu DSS Offshore - January 2007 to December 2007

Description

Supervalu is a kind of retail chain in the Minneapolis state of US. It has number of stores around the country. The project involved development of a application System for the Supervalu users.

Supervalu has the architecture implemented using J2EE technology.

Responsibilities

• Worked as the WebSphere administrator and java/J2EE developer.

• Setting up the environment and configuring the server fine tuning parameters.

• I have developed the business screens from scratch, Change requests, bug fix in the application.

• Used to build and deploy the applications in the server.

• Building the test cases and to test the application,

• Addition to this, I used to coordinate with the team members at onsite by sending daily and weekly status report.

• Being the only team member in the offshore in java team, I worked and achieved the project target by fulfilling the client requirements in the very short span of time.

Team member and Developer

Vector - August 2005 to December 2006

Description

Thomas Cook (India) Ltd deals in the businesses of Foreign Exchange, Travel Management, Leisure Travel, Call Centre.

The project involved development of a Front Office System for the TCIL users and also interfacing the application with their existing SAP module and Central Reservation Systems such as Galileo and Amadeus for air travel bookings.

FOS has a three-tier architecture implemented using J2EE technology. The client-side is implemented as a fat client developed in Java Swing.

Responsibilities

• Worked as System Administrator and involved in upgrading the WebSphere application servers

• Responsible for the development of business screens by analyzing and gathering the client requirements..

• Involved in testing of environments. It includes functional testing of the application. Integration testing of various external applications.

• Preparing the System test cases and do the integration and regression testing of the application.

Contributions/Achievements

• I have been appreciated by the SuperValu client, US for performing the server administration and development work from offshore being the only team member in offshore. For this, I have been selected for the Star of the Month.

• I have been also awarded two times for taking special initiatives and for continuous good performance in Passport Seva project.

• Also awarded for technically grooming the freshers and for the training sessions conducted for new team members in the project.

Technical Skills

Software

• During my tenure in TCS, I worked and installed application servers and developed applications in Java/J2EE using softwares and technologies like MVC architecture. I worked on DB2 7.0, 9.5.

• I have worked on Core java, JSP, servlets, HTML, SQL, Java script, XML, UNIX shell scripting.

• I have worked on Operating systems like MS Windows XP Professional, MS Windows 98, MS Windows 2000, AIX 6.1.0.0, and Linux.

• Worked on the clustered environment of WAS Portal and Process server as WebSphere Administrator.

Tools

IBM WebSphere Application Server 6.1, IBM WebSphere Portal Server 6.1, IBM HTTP Server, SUN iPlanet, IBM WebSphere MQ 6.0, LDAP, Visual Source Safe (VSS), Teradata Client, Advance Query Tool (AQT)

as DB2 Client, Toad 3.0, Mercury Quality Center 9.0, Rational Clear Case, SQL Plus, My SQL client, TCS Consult, SVN, IBM WebSsphere Application Development Environment (WSAD 5.1.1, 5.1.2) as IDE, Rational Application Developer(RAD 7.0.0) as IDE

Domain Experience Retail domain, E-commerce, Travel, Hospitality, Government domain

Management Experience

• I worked as the module lead by owning the responsibility and handled the team well.

• I also worked as the offshore coordinator in WebSphere Administration and Java team. Since, I was the only member in the offshore so I had to coordinate with the onsite team and had managed the development work, Change requests, Daily Status reports, team meetings, estimation of work assigned by understanding the requirement of the customer.
